

# BIS COMPULSORY REGISTRATION SCHEME (CRS) GUIDE

## SCHEME-II CONFORMITY ASSESSMENT FOR ELECTRONICS & IT GOODS

Notified by the Ministry of Electronics & IT (MeitY) and DPIIT under the BIS Act 2016, the Compulsory Registration Scheme covers over 75 categories of electronic, IT, audio-visual, solar, and battery products.

### KEY CRS ELECTRONIC PRODUCT CATEGORIES & STANDARDS

| Product Category                 | Applicable Indian Standard   | Key Safety Parameters Evaluated                              |
|----------------------------------|------------------------------|--------------------------------------------------------------|
| Laptops, Notebooks & Tablets     | IS 13252 (Part 1): 2010      | Electrical insulation, fire retardance, temperature rise     |
| Mobile Phones & Smartphones      | IS 13252 (Part 1) & IS 16333 | SAR value limits, charger interface, Indian language support |
| Lithium-ion Cells & Batteries    | IS 16046 (Part 1 & 2): 2018  | Overcharge safety, short-circuit, thermal abuse, drop test   |
| LED Bulbs, Luminaires & Drivers  | IS 16102 (Part 1) & IS 15885 | Surge withstand, harmonics, insulation resistance            |
| Smart Watches & Fitness Trackers | IS 13252 (Part 1)            | Battery isolation, ingress protection, low-voltage safety    |

### REGISTRATION WORKFLOW & R-NUMBER GENERATION

- 1. Sample testing in BIS recognized NABL accredited lab in India.
- 2. Online application submission on CRS portal within 90 days of test report date.
- 3. Generation of unique 8-digit R-number (e.g., R-XXXXXXXX).
- 4. Affixing standard CRS logo with R-number and standard text on product and packaging.

## **AUTHORIZED INDIAN REPRESENTATIVE (AIR) PROVISIONS**

For foreign manufacturers located outside India, appointing an Authorized Indian Representative (AIR) is legally mandatory. The AIR must be an Indian citizen or registered entity in India that assumes joint legal liability for conformity and consumer grievance handling.

## **VALIDITY AND INCLUSION OF NEW MODELS**

- CRS Registration is granted for an initial period of 2 years, renewable for up to 5 years.
- New models sharing identical electrical architecture, PCB layout, and safety components can be added under Series Inclusion without repeating complete full-test cycles.
