

BIS FOREIGN MANUFACTURERS CERTIFICATION SCHEME (FMCS)

OPERATING GUIDELINES FOR OVERSEAS FACTORY CERTIFICATION

BIS operates the Foreign Manufacturers Certification Scheme (FMCS) since the year 2000, enabling overseas manufacturing units to obtain an authentic BIS licence to use the Standard Mark (ISI mark) on goods exported to India.

FMCS LICENSING PREREQUISITES

- The overseas manufacturing location must have all required in-house production machinery, testing facilities, and qualified quality control personnel complying with Scheme-I.
- Appointment of an Authorized Indian Representative (AIR) who is an Indian resident or registered Indian entity.
- Submission of physical audit charges (USD 7,000 advance inspection deposit plus actual travel/visa/boarding for 2 BIS inspecting officers).
- Furnishing a Performance Bank Guarantee (PBG) of USD 10,000 from an RBI-approved scheduled commercial bank.

AUDIT AND FACTORY INSPECTION PROTOCOL

BIS auditors travel to the overseas factory, witness complete testing of products against Indian Standards, verify calibration certificates traceable to BIPM/national metrology institutes, and draw counter-samples to be tested in BIS laboratories in India.
