

BIS SCHEME-X MODULAR CERTIFICATION FRAMEWORK

CONFORMITY ASSESSMENT FOR INDUSTRIAL MACHINERY & ELECTRICAL SWITCHBOARDS

Scheme-X allows manufacturers of custom, heavy engineering capital goods, power transformers, and low-voltage switchgear to certify complex modular assemblies through Factory Production Control (FPC) and design verification without destructive full-assembly testing of every custom variant.

FRAMEWORK REQUIREMENTS

- Design verification against relevant Indian and ISO/IEC standards.
- Type testing of base modular sub-assemblies (breakers, busbars, enclosures).
- Comprehensive Factory Production Control (FPC) audit by BIS.
