

BIS TESTING MANUAL & LIMS DIGITAL WORKFLOW

BLIND CODING, SAMPLE LIFECYCLE & ELECTRONIC TEST REPORTS (ETR)

The Laboratory Information Management System (LIMS) is an end-to-end cloud platform automating the lifecycle of test samples drawn across India.

KEY LIMS PILLARS

- **Automated Blind Coding:** When a factory or market sample is received, LIMS automatically replaces manufacturer details with an encrypted alphanumeric barcode to eliminate bias.
- **Direct Machine Data Acquisition:** Test readings from tensile machines, spectrophotometers, and electrical safety analyzers are captured electronically.
- **QR-Coded Electronic Test Report (ETR):** All final test reports feature a tamper-proof cryptographic QR code verifiable on the BIS website.
